1 Introduction

1.1 Zoom

Zoom is the leader in modern enterprise video communications, with an easy, reliable cloud platform for video and audio conferencing, collaboration, chat, and webinars across mobile devices, desktops, telephones, and room systems. Founded in 2011, Zoom helps businesses and organizations bring their teams together in a frictionless environment to get more done. Zoom is headquartered in San Jose, California.

This solution is in partnership with PCI Pal, enabling companies to take payments from their customers over the phone.

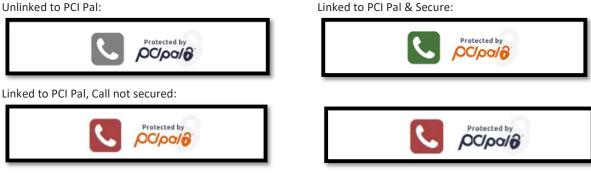

This document will take you through some of the troubleshooting areas of the solution.

2 Zoom Phone – Agent Assist & Speech Payment Journey

i. Securing the call:

Unlinked to PCI Pal:

If your line is not securing, Zoom will need to investigate further.

Obtaining Session Information ii.

When opening a support case, the team will need some specific information in regard to the PCI Pal element of the call. Please note that this needs to be collected by the Agent BEFORE closing the flow. The Agent will need to kick on the PCI Pal logo at the top

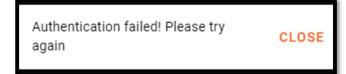

This will open up a popup. The Agent will need to copy and paste this data to the support team.

If unlinked not all data will be populated.

iii. Application Alerts:

This alert will appear if the application is unable to confirm authentication of the settings set up by the Admin. The Launch button will not appear

Unable to create session, please check your settings	This alert will appear if the app is unable to launch a session to take a payment
Phone call is not securable CLOSE	This alert will appear if the call is on a non- securable line. Zoom will need to investigate this.
Launching session CLOSE	This alert appears at the bottom of the app when the Payment Journey is starting
Media succesfully redirected CLOSE	This alert appears at the bottom of the app when the call has been successfully secured
Phone call status not found CLOSE	This alert appears when PCI Pal is un-sure whether the call is securable. The Agent will likely need to re-establish a new call, or take the payment via the Digital payment journey.
Call ended	This alert appears at the top of the app when the call has been disconnected. This is a Zoom alert.
Poor network connection. Audio quality may be affected.	This alert appears at the top of the app should Zoom believe the Agent's network to be weak or comprised during a call. This is a Zoom alert.
Cardholder audio stream has been lost or muted, reverting to non-secure mode	This alert will appear should the call be unable to keep secure. At the same time the Phone icon will go from Green to Red.
Unable to redirect media for call 065f8206b27761c1309	This alert will appear if the call was on a secure line, but unable to be secured successfully. It will re-attempt a few times. <i>The Session ID will differ for each call.</i>

3 Zoom Phone – Digital Payment Journey

v. Securing the Digital Session:

Digital Session Not Connected:

vi. Obtaining Session Information

When opening a support case, the team will need some specific information in regard to the PCI Pal element of the call. Please note that this needs to be collected by the Agent BEFORE closing the flow. The Agent will need to kick on the PCI Pal logo at the top

Digital Session Not Connected:

Digital Session Connected:

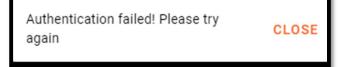

This will open up a popup. The Agent will need to copy and paste this data to the support team.

Support Details	<
Current Time (UTC): Thu, 08 Feb 2024 17:13:41 GMT Web Session Id: d07b560c-54a9-413b-951d- d4038641e10a Primary Call Id: e2bcc502-e4d3-4b05-9d3c- 18543290dd0a Secondary Call Id: Caller Number: Called Number:	
Send Email Close	

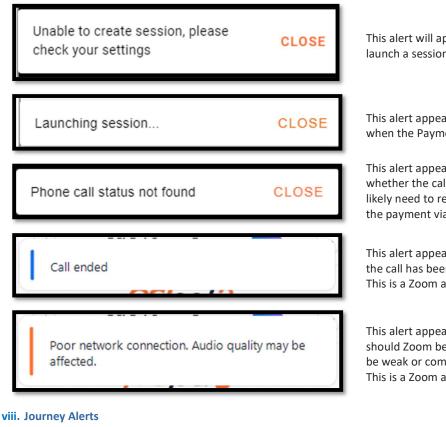

If unlinked not all data will be populated.

vii. Application Alerts:

This alert will appear if the application is unable to confirm authentication of the settings set up by the Admin. The Launch button will not appear

This alert will appear if the app is unable to launch a session to take a payment

This alert appears at the bottom of the app when the Payment Journey is starting

This alert appears when PCI Pal is un-sure whether the call is securable. The Agent will likely need to re-establish a new call, or take the payment via the Digital payment journey.

This alert appears at the top of the app when the call has been disconnected. This is a Zoom alert.

This alert appears at the top of the app should Zoom believe the Agent's network to be weak or comprised during a call. This is a Zoom alert.

This alert will appear at the end of a full payment journey. You are able to take additional payments from the same caller after this page, without the need to hang up the call.

[End of Digital]

4 Zoom Phone – Telephony SIP Messages

ix. SIP Error Codes:

- If the PIN submitted by Zoom is incorrect, PCI Pal telephony will respond with a "603 Declined".
- Both call legs must reach PCI Pal with 15 seconds of each other. PCI Pal will respond with "603 Declined"
- Codecs must be the same on both call legs
- If the Customer is multi region, and the region selected is incorrect PCI Pal will respond with "603 Declined".
- If the sessions pin was previously secure (and unsecured) the session PIN will not work on additional attempts. PCI Pal will respond with "603 Declined".
- If the call is routed to PCI Pal Region, and the Customer is 'Unknown on CLI' then PCI Pal will respond with a "503 No Route Found"
- If no audio is presented to the card holder leg for more than 10 Seconds, then the call will be unsecured and the phone icon will change from Green to Red.

These error codes are in the SIP messaging only, they do not populate any warnings or alerts on the PCI Pal Flow/App/GUI

5 Unsupported Scenarios

- Agent A transfer to ZCC Agent B (Test not supported)
- Agent A takeover call from Agent B (using BMWT) (Test not supported)
